

INTEGRATED INTERNATIONAL SCHOOL (IIS) – Celebrating 10 Years of Redefining Success!

Based in leafy Clementi, IIS is an inclusive school that follows the Australian Curriculum and was founded by clinical psychologist, Dr. Vanessa von Auer. Beginning with just five students, the school has grown to 80+ students and is celebrating its 10-year anniversary.

HOLISTIC AND PERSONALISED

At IIS, they firmly believe that the traditional 'one size fits all' approach to learning just doesn't work in today's modern fast-paced world. Learning styles matter, not all children can cope or adapt in a big class or school setting. IIS aims to create a holistic and personalised educational experience with small class sizes, high teacher-to-

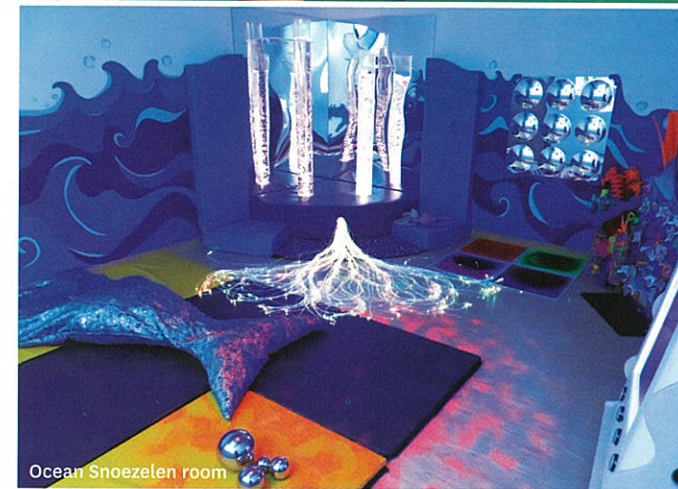

student ratios (1:4 in Primary and 1:6 in Secondary) and dedicated on-campus support for those who require extra attention.

Support Services offered include counselling, occupational and/or speech therapy, social skills training and behavioural therapy. Students are provided with individualised sessions during school hours so that they can "just be kids" once school finishes for the day.

"Our inclusive classrooms are filled with diverse learners. We encourage our children to learn from each other, to discover different nationalities and cultures but also understand that everyone learns and handles situations in their own way – and that this is the "spice of life."

– Founding Principal, Dr. Vanessa von Auer

LEARNING APPROACHES

IIS offers two learning approaches; Mainstream and Mainstream with Support. With both approaches running in tandem, each student receives the differentiated, yet inclusive learning experience they deserve, as well as developing balanced perspectives and a greater understanding of their fellow students.

The school welcomes new students throughout the year, whether the families are relocating from overseas or found that their former school wasn't able to provide specialised support for their child. IIS have built great relationships with other international schools who will often refer students as they understand what IIS is able to offer. Many families

have joined IIS as they felt overwhelmed and under pressure in larger school settings and desired smaller class sizes with individualised education in a boutique yet international learning environment.

UNIQUE FACILITIES

When you walk through the doors of IIS, you'll discover unique, purpose-built facilities such as the one-of-a-kind Ocean Snoezelen room. This multi-sensory environment provides students with stimulation and relaxation using smell, touch, sound, colour, and light. Take time to watch the fish swim by as you listen to calming waves, or play with colourful fibre optic tentacles as you discover an endless stream of mesmerising bubbles!

Another popular space is

the Occupational Therapy gym, with colourful swings, cosy hammocks, climbing ladders and a slide, it's a fun space that improves students gross and fine motor skills, enhances their confidence and lets them learn through play. In-house support staff have private suites to provide counselling, speech and Naturalistic Applied Behaviour Analysis (NABA) therapy sessions.

CREATING A PATH TO SUCCESS

The school's ultimate goal is for all of their students to achieve their own highest level of success, whatever their learning style, by working with teachers who

will adapt lesson plans to each individual student's strengths. Helping your child create their own path to success is what IIS works towards every single day. IIS believes that every child deserves a great quality education and the opportunity to enjoy school whatever their learning style. From this belief stems their motto that every child can be successful with the right teaching approach.
